

## Starting procedure: 5min - 4min - 1min - start

Note that the manual controls for the horn (switch inside the tower and the foot switch on the outside platform) if needed, still work as before.

### Turn timer on at mains plug

Press **start** on timer: Please note that starting sound signals are now automatic  
The timer will start counting down from 6 minutes

At 5 minutes and 10secs the timer will beep at 1 second intervals down to 5 minutes when it will then automatically sound the horn for the five minute signal.

Hoist warning flag(s). 

At 4 minutes and 10secs the timer will beep at 1 second intervals down to 4 minutes when it will then automatically sound the horn for the four minute signal.

Hoist preparatory flag. 

At 1 minutes and 10secs the timer will beep at 1 second intervals down to 1 minute when it will then automatically sound the horn for the one minute signal.

Lower preparatory flag. 

At 0 minutes and 10secs the timer will beep at 1 second intervals down to the start when it will then automatically sound the horn.

Lower class flag(s).

The timer will then start to count up.

*If any boat is over the line at the start make one sound signal with the manual controls and attempt to hail the boat by class and sail number.*

### Shorten course procedure

Hoist code flag S and make two sound signals with **foot switch** as before.

### Finishing

When finishing use the **remote control** attached to the timer to make the sound signal for each finisher. This will automatically store the finishing time for each boat.

Also record finishing times manually as before *but* these can now be checked at the end of the race against the stored times. (see below)

Reset the timer for the next race: press and hold Log then press and hold Menu for 5 seconds *OR* simply turn off and on at the mains plug.

The finishing times are still stored even though the clock has been turned off.

Now review the times:

Press **Log** on the timer – the first finishing time will be displayed, then **press +** to display the next stored time etc etc. **Press Log** again to finish review.

Note that these finishing times are stored until you press **Start** again for the next race.
